

ScanNCut Project: Gift boxes

With gifts, it's also what's on the *outside* that counts.

Decorative gift boxes are a great way to show how much you care. And with personalized design elements, you can make your gift count inside and out for the person who matters most. Create your own canister-shaped gift container for that someone special by following the simple steps below!

MATERIALS:

- 13" metal canister with removable lid
- 10 kinds of fun, colourful papers
- Size of "FOR YOU" text: cut to 1.96" x 2.76"
- Rhinestones
- Ribbon
- Lace flowers
- Glue

Step 1

Create the side pieces that go around the can. Use a tape measure to measure the can's circumference. If it's longer than 12", cut as multiple pieces.

Tip! When cutting dark-coloured material using Direct Cut, use a white or other light-coloured pen to draw the cutting lines on the back of the material for better recognition. **Function:** Direct Cut

Measure your can's circumference.

Step 2

The circumference of the can used in this project is 13". Since it's greater than 12", cut the side piece in two parts, each measuring about half the length (6.75").

Measurements based on your 13" can.

ScanNCut Project: Gift boxes

Step 3

Hand draw band lines for the side pieces on the back of the material and cut using Direct Cut. **Function:** Direct Cut

Cut out your bands.

Step 4

Glue the cut bands to the side of the can.

Glue the bands around the can.

Step 5

Cut the built-in pattern pieces. Glue the first ribbon and then the cut pieces to the can in layers.

Built-in patterns: BA-A045, BA-A048, BA-A051, AR-A011, AR-A014, AR-I001, AR-K028, LO-A021

Get crafty with your ribbon.

Step 6

Decorate by attaching lace, rhinestones, and other items. Position your lace and ribbon over the edges and seams for a great, finished look.

Make it personal with lace and any other embellishments you choose!

You're done.

Now you just have to figure out what goes inside the box!
